

SECTION 1: COURSE OVERVIEW / 19 mins, 5 parts

• 2/5 Course Introduction

○ -> **Content of the video**

- -> Python
- -> this introductory lecture is about admin etc -> advice, help, notebooks

○ -> **Features of Udemy**

- -> you can change the speed of the videos on Udemy
- -> alt. subtitles

▸ -> **There is a Q&A section**

- -> look for answers for the question
 - there are course notes and their code from the videos is published in the course notebooks, for comparison
 - you can do stack overflow / google searches if you get stuck
 - they also have Q&A forums for the search -> the question may have been asked before
- -> if none of that works, then ask the question
- -> if the question is to do with the platform, email Udemy -> support@udemy.com

○ -> **How to make the most of the course**

- -> use the Jupyter notebooks which they give you
- -> go through them while going through the video material in the course
- -> he's suggesting that more experienced people go straight to the notebooks -> and only watch the relevant videos

○ -> **Notebooks**

- -> they're hosted on GitHub
- -> they are a separate file type

○ -> **The student chat channel**

- -> in other words, there's a discord server for the course
- -> networking
- -> there is a link to a YouTube video explaining how to join the discord
 - this is to connect students
 - leave questions to the chat channel
